Profile

Senior Full-Stack & Mobile Engineer with 8+ years of experience building production-ready web and hybrid mobile applications. I specialize in React, React Native, Next.js, Node.js, and PostgreSQL, with a strong focus on delivering scalable, high-performance software. I recently architected and shipped Surveyi, a full SaaS platform (Next.js + Express + Neon + Stripe) built end-to-end, demonstrating my ability to design, build, deploy, and operate complete systems. I thrive in fast-paced environments, owning features from concept through deployment, and delivering high-quality, maintainable code.

HIGHLIGHTED PROJECT – SURVEYI (2024–2025)

Full-Stack SaaS | Next.js · Express · Neon Postgres · Stripe · React Query · Tailwind · Linux
https://surveyi.app

Architected and shipped a complete SaaS platform (Next.js + Express + Neon + Stripe), including authentication (email + Google), RBAC, session flows, analytics engine, dashboards, sentiment processing, and KPI strips. Designed and deployed secure Linux infrastructure (Nginx, HTTPS, UFW, PM2) and integrated Stripe billing for payments, subscriptions, and webhooks. Delivered a full marketing site with SEO routing, dynamic metadata, and OG images to support a production-ready launch.

Experience

SENIOR REACT NATIVE ENGINEER – AHTG – *2022–2025 • REMOTE / UTAH*

Developed and maintained core features for mobile applications used daily by healthcare and field staff. Designed and owned a shared React Native component library that standardized UI/UX across multiple internal apps. Improved app performance and stability through profiling, refactoring, and modernizing legacy components. Collaborated closely with backend, QA, and product teams to define API interfaces, deliver features on tight timelines, and support long-term architectural decisions. Provided mentorship through code reviews and helped elevate engineering standards across the team.

FRONTEND ENGINEER — HIVEWIRE — 2022 • *LEHI*

Built scalable UI components with React, TypeScript, and Tailwind within a production-grade design system. Delivered clean, maintainable code using modern React patterns and contributed to feature development alongside an integrated team of designers and backend engineers. Played a key role in ensuring UI consistency, responsiveness, and accessibility across the product.

SOFTWARE ENGINEER — STORR — 2020 - 2021 • *SAN FRANCISCO/REMOTE*

Developed features across iOS, Android, and web using React Native, React, TypeScript, GraphQL, and Node.js. Worked on a social commerce marketplace enabling users to curate stores and sell brand-name apparel. Improved mobile rendering performance, reduced load times, and enhanced overall responsiveness across platforms. Collaborated cross-functionally to deploy features that contributed to user engagement and marketplace growth.

JUNIOR SOFTWARE ENGINEER — MINDFIRE TECHNOLOGIES — 2020 • *LAYTON*

Delivered full-stack features for multiple client projects using React, Vue, Angular, .NET, and MySQL in a fast-paced consulting environment. Built dashboards, UI components, and business logic for clients in real estate, productivity, and social media verticals. Adapted quickly to shifting project requirements and unfamiliar tech stacks while maintaining high-quality output and timely delivery.

JUNIOR FULL-STACK DEVELOPER — REDSKY TECHNOLOGIES — 2019 • *SPANISH FORK*

Developed kiosk and mobile user interfaces using React, jQuery, and vanilla JavaScript. Built and maintained the VR Junkies hybrid iOS/Android app, supporting loyalty points, session tracking, and booking flows. Contributed to full-stack debugging and enhancements across multiple internal applications while gaining experience in early-stage product development.

Education

Mountainland Technical College — Software Development, 2018 - 2019

Skills

Frontend: React · React Native · Next.js · TypeScript · JavaScript · Tailwind CSS · Redux · Vue
Backend: Node.js · Express · REST APIs · Flask · .NET
Databases: PostgreSQL · Neon · MySQL · MongoDB
DevOps & Infrastructure: Linux · Nginx · PM2 · HTTPS · UFW · SSH · Deployment · Server Hardening
Cloud & Integrations: Stripe (payments, subscriptions, webhooks) · Google Auth · Maps APIs · Twilio (SMS & messaging workflows) · SendGrid (transactional email) · AI-powered workflows & integrations
Testing: Jest · Mocha · Chai · Selenium
