Durham: apply the current requirement

The evidence

VA Durham medical center groundskeeping, notice 36C24626Q0892. Use https://sam.gov/opp/3c9006d433694934845656c2f4b3a420/view. Full Amendment 0003 was read (extracted document 4, paragraphs 1–399), together with relevant base paragraphs. The extraction uses paragraphs where PDF pages are unavailable.

What changed

Amendment 0003 replaces the older base-plus-four-option-year schedule. Its current line items show a base period of 1 Nov 2026–31 Oct 2027. It also changes technical answers and says prior groundskeeping was performed in-house.

Timing check

The notice snapshot is dated 10 Oct 2026. Amendment cover says 12 Oct at noon EDT, while continuation says EST. Recheck the official notice and confirm the ambiguity with the buyer before relying on a submission time. This is a dated worked example, not a promise the opportunity remains open.

Your decision record

One Durham notice brings several decisions together.

A familiar service still needs a close reading of the purchased work. Next action: Start with the latest amended requirement, then assess your business.

Your company evidence makes a relevant notice a better decision.

A classification match helps research; company qualifications determine what is supportable. Next action: Missing company evidence is a question to resolve before committing.

End the session with a concrete next action.

An answer is most useful when it changes what you investigate or prepare next. Next action: Save the reason, source and owner for the next action.
