Key terms and learning references

MCP — Model Context Protocol

The standard that lets an assistant call connected tools and obtain their data. Qualified Bid uses a hosted MCP connection.

Full destination: clickable reference and QR code.

OAuth

A sign-in and authorization method. Complete Qualified Bid sign-in through the offered flow; an assistant login alone does not connect Qualified Bid.

Published client identity

The assistant identifies itself through a published client identity. Use this when offered by Qualified Bid's guide; leave a fixed client secret empty.

Key terms and learning references

Streamable HTTP

The remote-server transport to select in Codex for https://mcp.qualifiedcapacity.com/mcp. It connects to a hosted server, rather than a program installed on your computer.

Custom MCP server in ChatGPT

The current web connection route is Plugins; then Add; then Add custom MCP server. OpenAI renamed this route; organization permissions and interface rollout still matter.

Key terms and learning references

UEI — Unique Entity ID

An entity identifier that you may supply when creating a company profile. It is optional for initial Qualified Bid profile setup; that is separate from requirements to compete for a particular contract.
